

To whom It May Concern:

K-LOVE serves my family and friends in a very positive way in the local community of Henry County-Martinsville. It is wholesome, supports family-friendly programming and gives a positive outlook in this current time of need the nation is in. If K-LOVE were to be displaced by an LPFM broadcaster providing other programming, the morals and values would surely be lost. There are enough negative, rude, and x-rated stations out there. K-LOVE is special, and you can be assured when you turn it to that station, which is 106.7 FM in this area, you don't have to worry about turning the station in front of kids, or something that will embarrass you, like the current talk shows, and adult comments most stations have now. It is focused on family, love, good relationships, and spirituality. I believe it is in the public interest to keep K-LOVE alive and not to let LPFM get control. A lot of the community may not know about this chance to send comments to the FCC, but I am sure they have an opinion about it. The K-LOVE signal serves hundreds of thousands of listeners, and it has a very encouraging impact on my family alone.

K-LOVE is also 100% listener supported, which shows how much it is loved and cherished in itself. This nation has gone downhill, and most stations that are on FM now should be for ears 18+ up in age. We wonder why our kids do the things they do, think they way they do, and even dress the way they do. Just turn on the radio, and you will hear 90% of the encouragement for their actions. I hope my comments are read and taken seriously. I am available for further comments via email.

Sincerely,
Angela Naff
